UN Open GIS Monthly VTC

21 January 2026

Ariel Anthieni, OSGeo Foundation

Hidenori Fujimura, Japan International Cooperation Agency

Josep Parareda, United Nations Geospatial Information Section

Agenda

1. Comments by co-chairs, introduction of new participants
2. **A Framework of Geo-AI for Object Detection and Classification using OGC Standards - from Data Collection to Visualization** — Ki-Joune Li
3. DWG and pilot project reports — leads; ascending order
    1. DWG-1: **Hybrid GIS platform** – Timur, Zeeshan, Epa/Rodwell, Akbar, #Cung
        1. Mobile GIS Solutions – Epa/Rodwell, Zeeshan, Cung
        2. UNMISS Story Map – Zahurul/Akbar/Debasish, Timur
    2. DWG-2: **Capacity Building** – Ivan, Susan, Diego
    3. DWG-5: **Geo-AI and Analytics** – Zhongxin, Maria, Andrea, #Cung
    4. DWG-6: **OpenDroneMap and 3D** – Stephen, Catalina, Davide, #Cung
    5. DWG-7: **Smart Maps** – Hidenori, Diego, #Timur
    6. DWG-8: **Open-source Implementation of IGIF** – #Ariel, Horacio
4. Any other business

DWG-7: Smart Maps

Keep web maps open. Test new technologies. Practice software freedom.

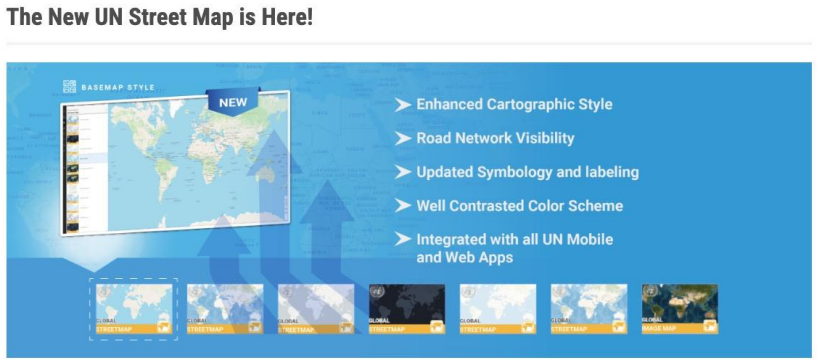
Contribution of UNVT to UN Street Map

- **UN GeoPortal** includes two base maps:

UN Street Map (UNVT) and UN Street Map.

- UN Street Map (UNVT): built with **open-source** technologies

- UN Street Map: built with **Esri** solutions



- The UN Street Map style was recently updated.
- Therefore, we adjusted the UN Street Map (UNVT) style to match the updated UN Street Map, using **unvt/charites**.

New tool: **unvt/vt-optimizer-rs**

- A new Rust-based tool inspired by **ibesora/vt-optimizer**.
- Following an example of unvt/charites, **Yuiseki** donated her personal project to the UN Vector Tile Toolkit.
  - To **inspect**, **optimize**, and **simplify** vector **MBTiles** and **PMTiles**.

```
## Histogram
  range                 count     bytes      avg    %tiles     %size  acc%tiles   acc%size
  77B–22.90KB            1344    5.50MB   4.19KB    74.96%    16.63%     74.96%     16.63%
  22.90KB–45.72KB         190    6.18MB   7.80KB    10.60%    18.66%     85.55%     35.28%
  45.72KB–68.54KB         102    5.63MB  10.83KB     5.69%    17.01%     91.24%     52.29%
  68.54KB–91.37KB          71    5.50MB  13.68KB     3.96%    16.62%     95.20%     68.91%
  91.37KB–114.19KB         42    4.14MB  15.78KB     2.34%    12.51%     97.55%     81.42%
  114.19KB–137.01KB        23    2.79MB  17.19KB     1.28%     8.44%     98.83%     89.86%
  137.01KB–159.84KB        13    1.88MB  18.14KB     0.73%     5.68%     99.55%     95.54%
  159.84KB–182.66KB         3  509.17KB  18.40KB     0.17%     1.50%     99.72%     97.05%
  182.66KB–205.48KB         3  567.20KB  18.68KB     0.17%     1.67%     99.89%     98.72%
  205.48KB–228.31KB         2  434.02KB  18.90KB     0.11%     1.28%    100.00%    100.00%
```

Tile size example from Koji's Tutorial

Any other business

For information:

- Schedule for the meetings
  - https://github.com/unopengis/roadmap/issues
- Member Information Update
  - https://github.com/UNopenGIS/unopengis.github.io/issues
- Speakers for the next VTCs
  - February:
    - **Timur Obukhov** - Hybrid GIS Infrastructure
    - **Ariel Anthieni** - GSGF implementation with Open Source with ECLAC
  - March:
    - **Koji Osumi** – UN Vector Tile Toolkit (TBC)
  - Please let co-chairs know if you are interested in speaking.
- February VTC: 2026-02-18T15:00/16:00(CET)
